

# Speed up new supplier due diligence

## Keep risky suppliers out of your supply chain

The resilience of supply chains hangs on procurement's ability to quickly assess the risk of new and existing suppliers, identify potential issues, and rapidly source alternatives.

But when due diligence takes days —and potentially thousands of suppliers need regular assessments — how can teams keep pace when just one disruption could expose your organization to significant risk?

Evaluate vendors and suppliers in real-time, get ahead of risk, and perform due diligence in minutes, not days, with Interos.
